PROFILE SUMMARY

Aspiring software developer with a strong interest in building user-focused applications. Experienced in building working solutions through projects, with an understanding of both frontend and backend development. Comfortable learning new technologies and working through the complete development process, from designing interfaces to integrating APIs and managing data. Looking to begin my professional career in a role where I can contribute to meaningful projects and grow into a strong software professional.

TECHNICAL SKILLS

- **Programming Languages:** Java, OOP Concepts, Exception Handling, Logging, Input Validation
- **Backend & Frameworks:** Spring Boot, REST APIs, JSP & Servlets, Microservices, JPA, Hibernate (ORM), Spring Data JPA
- **Web Technologies:** HTML5, CSS3, JavaScript, React JS, Angular (basic exposure), Responsive UI Design
- **Database Management:** SQL, MySQL, DBMS, RDBMS, SQL Server, Joins, Stored Procedures (basic), Data Modeling
- **Version Control & Tools:** Git, GitHub, VS Code
- **Practices:** Coding Standards & Best Practices, API Integration, Basic SDLC, Agile/Scrum, Code Reviews, Debugging

SOFT SKILLS

- Highly motivated and eager to learn new things.
- Strong analytical and problem-solving skills.
- Good communication and team collaboration abilities.
- Quick learner with adaptability to new technologies.
- Excellent time management and attention to detail.

PROJECTS

AI English Speaking & Communication Platform | *Java, Spring Boot, HTML5, CSS3, JavaScript, Supabase, Gemini API*

- Developed a full-stack AI-powered English Speaking platform using Java Spring Boot for the backend and HTML5, CSS3, JavaScript for the frontend, applying consistent coding standards across modules. Implemented secure authentication and RESTful APIs.
- Integrated the Google Gemini API to build an AI Conversation Partner, AI Group Discussion Assistant, and provide real-time conversational responses, grammar correction, vocabulary suggestions, and personalized English learning assistance.
- Designed interactive learning modules including Vocabulary Builder, Speaking Challenges, Pronunciation Practice, Grammar Improvement, and personalized onboarding to enhance users' communication skills.
- Built an Admin Dashboard for managing users, scheduling Group Discussions, monitoring learner progress, maintaining conversation history, and storing application data securely using Supabase.

LearnFlow – E-Learning Management System | *HTML5, CSS3, JavaScript (ES6), JSON Server, REST API, Local Storage*

- Built a full-stack-style E-Learning Management System enabling user registration, login, course browsing, and enrollment, with a JSON Server-backed REST API and Fetch-based CRUD operations for course and user data.
- Implemented client-side authentication and secure session handling with Local Storage, along with course management, enrollment tracking, and personalized dashboards showing enrolled courses.
- Designed a modern, responsive glassmorphism UI with reusable components, dynamic data-driven course listings, and a profile-based logout flow, ensuring smooth navigation across devices.

EDUCATION

B.Tech in Computer Science and Engineering | CGPA: 8.1/10
Sri Venkateshwara Engineering College, Suryapet | 2022 - 2026

CERTIFICATIONS

Web Development Internship | CODSOFT

- Built responsive web pages using HTML, CSS, and JavaScript.
- Created projects like landing pages, portfolio websites, and a Simple Calculator.
- Improved skills in UI design, debugging, and structuring clean code.
